0	Get ready to work:	2
1	Let us first look at the information for a single respondent. What do you think the <code>subset()</code> function did here?	3
2	So, what is the story of person 2011? What we do we know about this person?	4
3	In the reading Kaplan had an example where the cases were seashells. What are the cases in the GSS 2010 data frame?	4
4	What is a variable? (in contrast to a case)?	4
5	What does <code>dim(gss)</code> tell you about the size of this dataset (in terms of cases and variable)?	4
6	What kind of variable is <code>happy</code> ?	4
7	What kind of variable is <code>babies</code> ?	4
8	Try this command: <code>with(gss,summary(happy))</code> + How many people refused to answer this question? How many people reported being “not too happy”?	4
